**Jeff Tse Biography:**

Jeff Tse grew up in Hong Kong and New York City. As an adult, Jeff picked up the camera and quickly acquired all the skills to become a successful sports photographer publishing shots of celebrity athletes like Lance Armstrong. Seeking to create and refine imagery to be more perfect, he transitioned to beauty and fashion photography.

Many photographers are driven by something singular in their imagery. Jeff defines his work as a play of light and form. He strives to create imagery that parallels sculpture more than two-dimensional photographs. His goal is to translate subliminal aesthetic forms into imagery that is timeless and beautiful. Instead of catering to passing trends, he strives to develop an aesthetic that is universal across genres.

Jeff's work has appeared in Harper's Bazaar, Marie Claire, Allure, Teen Vogue, Seventeen, Elle and Cosmopolitan, among others. His advertising clients include Pantene, Neutrogena, Vichy Cosmetics, Dior, Cover Girl, John Frieda, Nexxus and Frederic Fekkai.

Jeff lives in NY.

# PERSONAL LIFTING

LA PROMESSA DI UNA CREMA ANTIAGE? ATTENUARE I SEGNI DEL TEMPO, RIDANDO TONICITÀ, LA SFIDA DEI LABORATORI VICHY: LEVIGARE E RASSODARE I TRATTI DEL VISO, DISTENDERE LE RUGHE, RIATTIVARE I MECCANISMI DI UNA PELLE GIOVANE, COSTANTEMENTE E IN MODO VISIBILE. CON UN TRATTAMENTO INNOVATIVO, ANZI DUE.

Dal primo trattamento "ricostituente" per la pelle al nuovissimo lifting biologico: sono passati dodici anni dal debutto di Liftactiv. Sono cambiati gli attivi e le sinergie ma non gli obiettivi: una pelle più tonica, liscia e meno segnata, seguendo i canoni della nuova bellezza che oggi non si accontenta di ottenere la rughe ma richiede un'intenzione in più al sostegno e al turgore del viso. Il nuovo Liftactiv CxP, infatti, si concentra sulle cellule responsabili della produzione di fibre giovani del derma. Nella zona sotto l'epidermide, infatti, le fibre elastiche e di collagene si concentrano (rappresentano l'80 per cento del peso del derma) e svolgono, tra l'altro, la funzione di "imbottitura", conferendo tono e turgore al viso. Ed è proprio qui che si svolge l'azione degli attivi di Liftactiv CxP: peptidi, proteine che svolgono la parte di "matrone" cellulare e la Vitamina C, stimolatore dell'attività cutanea, sono la nuova coppia antiage in grado di rinforzare i fibroblasti, le cellule che assicurano il rinnovamento delle fibre dermiche. Ma oltre all'efficacia, Vichy ha pensato anche alla piacevolezza. La texture di questa crema, gradevolissima ha un effetto "lifting immediato": regala subito un aspetto più fresco, aiutando a mantenere la costanza dell'utilizzo del trattamento.

## IL GIORNO

Liftactiv CxP è un antiage diverso da tutti gli altri: non si limita solo ad attenuare i segni del tempo ma rassa, agendo come un "lifting biologico". È la pelle che, rinfrescata, genera il proprio lifting per lungo tempo. Il merito è di due attivi: l'acido C e i peptidi che rinforzano e stimolano la produzione di fibroblasti. Perfetto e partire dai 40 anni, offre una novità tecnologica: è una formula a rilascio prolungato, cioè i suoi ingredienti agiscono sulla pelle progressivamente in modo continuo, amplificando così il sostegno cellulare nel tempo. Esiste in due versioni: per pelle normale e mista, per pelle secca e molto secca. In farmacia.

## LA NOTTE

La pelle dopo il trattamento diventa più ricettiva e la formulazione specifica di Liftactiv CxP Night segue i ritmi biologici della sera: l'azione detassante della coppia di attivi Vitamina C e peptidi completa da una sostanza che "indolisce" l'attività cellulare notturna. Ideale per ridare comfort ed elasticità alla pelle secca e disidratata dagli agenti esterni durante la giornata.

## LA TECNICA DI MASSAGGIO

Esercizi muscolari e movimenti mirati: è questo il segreto della kinesio terapia, che in medicina è utilizzata per rieducare il corpo dopo un piccolo o un grande trauma. Vichy applica questa tecnica per "rieducare" la pelle e ottenere così un effetto lifting intensivo. Ecco come.  
1. RASSODARE: Gocciare la crema per 2 secondi per rimettere la pelle in tensione. Poi espone la lesione.  
2. ANTI-RUGHE: Con la punta delle dita, esercitare pressioni circolari sui segni del viso, per ammorbidire e distendere la pelle.  
3. ISTRUZIONI PER L'USO: Applicare Liftactiv CxP con piccoli tocchi e verso l'esterno, su fronte, guance, mento.

*Photography by JEFF TSE*

# EAT well

A macrobiotic diet may not sound luxurious – but a visit to a Spanish clinic loved by the A-list reveals it's as much about indulgence as GREAT HEALTH and WEIGHT LOSS. By Katy Young

Licking down at my generous plate of creamy mushroom risotto and baked of freshly baked olive oil, I can't quite believe that I am in a macrobiotic clinic. Growing up at the tail end of the 1970s, I saw the macrobiotic diet as one of the last remnants of the hippie lifestyle, followers fringed for nuts and seeds, adhering to the doctrine of doables of foods they could eat, and a very long list of those they couldn't. Macrobiotics made crumb crumb look positively tame.

But here in the sleek dining room at the Wellness Clinic, the world's first macrobiotic clinic, it's clear that macrobiotics has had a 21st-century makeover. Set up by Shizuko Fujita, whose health was transformed by a macrobiotic diet, this (like some macrobiotic) is a Japanese term meaning I thought macrobiotics could never be. As for the name, used as any LA health, stop the party stars (like the actress) in the Wellness Clinic, macrobiotics is not about going without. It's about eating and getting healthy through pleasure. I can see why Madonna and Celine have macrobiotic diets, and why Katie Couric has every year.

A macrobiotic diet involves eating grains as your staple food, supplemented by vegetables and beans, avoiding processed or refined ingredients, and treating the body to become sensitive to the effects of diet on health. And now it's not just a trend in the '90s, it's a lifestyle. Macrobiotics, and now by its healthy diet of rice, vegetables, beans, grains, and nuts, is a lifestyle. Macrobiotics, and now by its healthy diet of rice, vegetables, beans, grains, and nuts, is a lifestyle. Macrobiotics, and now by its healthy diet of rice, vegetables, beans, grains, and nuts, is a lifestyle.

First, macrobiotic consultant Virginia Harper diagnoses me that simply by looking at my tongue and hands, she knows I've eaten a sluggish digestion because I eat too much cold food (spiced), a diet weighed down in

fat (the daily 'santitas'), and a diet not for proteins – preferably in the form of nuts and seeds. I'm not sure if I'm meant to eat up my energy and sleep properly. Virginia explains the macrobiotic pyramid, listing foods at the base that I can eat as much of as I like (vegetables and cereals) and those at the top I need to be wary of, such as hard-to-digest meat and dairy, that "Sugar is the body, which is the root of any digestive problem or inflammation". Following a Chinese philosophy, macrobiotics states that every food is either a yin or a yang, but too much yin (meat or dairy) overstimulates the digestive system and uses your body and mind.

How, at this, nothing seems to be banned, just limited (you won't find meat, refined sugar and processed foods on the menu, but in my other macrobiotic you can have these at home), I even drink coffee at breakfast because I love it.

## The next best things

**THE LIFE EXPECTANCY**  
Macrobiotic diet has been an array of macrobiotic diets, developed by different (but often, like macrobiotic) to become more and more strict. (Source: www.macrobiotic.com)

**Organic Foods & Eat** has just launched organic growing in the macrobiotic diet with some dietary advice. (Source: www.macrobiotic.com)

**Macrobiotic Kitchen: Macrobiotic Cooking for Body and Soul** (by Virginia Harper) is the first book in the macrobiotic diet series. (Source: www.macrobiotic.com)

and I think they suspect, that I am never going to eat it, although I have not done.

Guests are even allowed to visit nearby shops, well known for their wine and food. But even at a foodie, there's no need to refuse me – with a world-class chef and an award-winning menu, the food at this is seriously good. I am amazed at how it's possible to eat so much but still have a flatter stomach, clearer skin, and noticeably better energy levels and mood in just four days.

There's plenty of time to relax, but also and classes are an integral part of learning how to 'cleanse from the inside out'. The yoga is good, but why eat it into a small meal when it could be done on a terrace? The on-the-morning beach walks are wonderfully grounding, and the gentle fitness classes are more to get the body working than to work up a sweat. My advice is to go in as much as you can, because, if nothing else, sharing experiences with the rest of the group is both helpful and bonding.

The cooking class is a must and I'm inspired by how many tips I've only shared into my everyday eating – and how just these small changes make a difference to my digestion. I've swapped olive oil for sesame oil as it's gentler on the stomach, and I love the way the chef adds so not to over-salt food. "Because cooking should be an art and gentle is the energy you want from it."

This is a very friendly down to earth house, and with lots of spa treatment and portable solutions, it feels like a pampering holiday, but without the blurring that one needs of pain and loved bodies leave you with. What is clear is how this quickly takes out the foods you shouldn't eat – not about the digestive system – and, as what's served is so easy and filling, you really don't notice it's anything less, with just a few macrobiotic recipes, what I eat can make such a quick and easily sustained difference to everything from the state of my skin to the quality of my sleep. (Source: www.macrobiotic.com)

### Top TIPS

- Eat quality, clean, fresh and organic food, especially if you're eating a lot of it.
- Use for whole foods, frozen rice, vegetables and beans to give you per cent energy.
- Don't drink your meals, drink between meals for more efficient digestion.
- Eat and sleep at regular times, following a sleep and meal pattern (about every 2 hours).
- Repeat your meal for 10 days, and eat dairy only on a garnish (a sign of success) not as the main part of your meal.
- Eat foods that are in season and grow in the region, they naturally support your body and energy levels better.

# LIVE longer

Can a week ahead help us to extend our LIFE EXPECTANCY? Katharine Cowley checks in to a 'longevity clinic' in Portugal to find out

I was never one of the 'worried well', but like everybody, I've got that mild obsession with finding out a little bit more about my mind and body and how to keep it going. I've been to a 'longevity clinic' with a crack team of doctors and their medical gale rising around me. I'm not it, but I'll certainly come away with a good insight into all aspects of my health.

These medical clinics may be a new concept to many of us, but it's long established on the continent, particularly in Switzerland and Italy. The nearest one, Longevity Wellness centre in Portugal, is a midpoint between two types of clinics: on one hand, the 'medical MDV', and on the other, those with the latest hi-tech machine that calculates how fast you're ageing, and perhaps where doctors are taking things into account when should a healthcare break that now?

Despite its sophisticated setting, with sweeping views of the Algarve, the scene is not hospital-like with alluringly appointed rooms, but not grandiose. But the hotel can't help but be a thing for why I'm here. There are more than 17 programmes to choose from, all of which are run in a medical but include complementary therapies. If you've got a back problem, you would be helped off with a massage with herbs, you'll see an osteopath. If that all sounds a million miles away from relaxation, don't worry because you can have as many massages, facials and wraps as you want, or a spa treatment for the day.

I choose the Emotional Wellness programme, because although I'm in my mid-thirties, a heart-disease-free five-year programme I had because with an average age of 70, and most analysis revealed the non-damaged skin of a woman in her forties. But it's not just vanity – I'm genuinely interested in the state of my

body. The ageing management is taken from La Clinica de Paris programme, and includes tests on blood, urine, body mass index, fat and stress.

A biophysical test was magnetic, nodes attached to my ankles and feet to measure fat, muscle and water content. The results show a whopping 39 per cent of me is body fat (the recommended amount is between 20 and 35 per cent). None of all. I have a level of visceral fat – which is stored around the organs and linked with heart disease, diabetes, type two diabetes and hypertension. I work out for four hours a week, watch what I eat and don't look overweight, so this is shocking. I'm told stress may be a culprit, so in a diet high in fat I'll concentrate the exercise with endless handfuls of peanuts, and used to fall off the healthy eating wagon at weekends. I now see how useful the clinic can be, as this knowledge inspires action, so it really can affect your longevity. The trick, I'm told, is to work out for longer hours to maintain an increased heart rate so gradually burn visceral fat, and in my area from saturated fat.

Then also show I'm clinically dehydrated, with more water inside the cells than inside, where it really matters interestingly, this could be one reason why I suffer with uncomfortable

### Top TIPS

- Leave all the stress about stress, says Dr. David. Don't battle or block out negative thoughts, instead, let them come in, observe them and even find humour in them if you can, and move on.
- Don't be picky about getting medical help, says Dr. Ribeiro, and don't follow the tradition of not seeing a doctor until you really need to.
- Complimentary treatments can be useful, but choose those that resonate with you, says Dr. Ribeiro. If you don't like it, don't go back – try something else.
- Find a couple of minutes every day to do the breathing down, says Dr. Ribeiro. The quality of our breath influences how long and how well we live.

**1.10.2010**

Осенью всегда хочется купить новые духи. Среди моих личных фаворитов – древесные теплые ароматы. Их немного, но они – безусловный тренд сезона, который идеально ложится на тему милитари. А для тех, кто хочет подчеркнуть свою чувственность, я собрала целый букет цветочно-фруктовых и акватических парфюмов.

## СИНИЙ

Фильмы семидесятых годов наводят на мысль, что раньше были только одни тени. Похоже, те благословенные времена возвращаются! Сегодня лазурные тени и синие подводят снова на пике популярности. Смело наносите небесные оттенки практически на все веко. Если вас пугает монотонность, можно поиграть на текстурах или интенсивности цвета. Вдоль ресниц хорошо будут смотреться более насыщенные глубокие тона, ближе к линии бровей ослабьте интенсивность, доведя ее до полупрозрачности. Подводя нижнее веко, начинайте с тонкой линии, постепенно утолщая ее к внешнему уголку глаза.

## ЗЕЛЕНЬ

Сочетание морской зеленоватой глубины и океанской синей бездны — хит сезона. Два ярких самостоятельных цвета, сливаясь, создают русалочий взгляд. Синие тени наносятся вдоль линии роста ресниц вверх по веку зигзагообразными движениями, а потом растушевываются. Зеленые тени уверенно занимают место по верхнему веку и у внутреннего угла глаза. Для нанесения лучше использовать плоскую, квадратную по форме кисточку. Это позволит добиться эффекта прозрачности. Немного золотой или серебряной пудры добавит шика и внесет в ваш образ нотку авантюризма.

# В ЦВЕТЕ

Самое модное хобби сезона – лекции по современному искусству, на которых мы узнали, что для создания шедевра нужно купить много красок и отбросить условности.

## СИРЕНЕВЫЙ

Хотите изменить свою жизнь? Начните с цвета помады! Фиолетовый осени – сиреневый. Главное – правильно выбрать оттенок. Пухлые губы требуют чуть более темных тонов, которые, как ни странно, привлекают внимание, а маленький рот требует розоватых нюансов. Чтобы сделать губы более полными, покройте их одним слоем помады, затем возьмите карандаш того же цвета и обведите контур, после чего нанесите второй слой. Хотите выглядеть строго – остановитесь на матовой текстуре, мечтаете блистать – воспользуйтесь блеском.

**P**at McGrath 說：「讓我們從順從的冬天態度過來，也讓我們從過去五年經濟蕭條後來個大逆轉。」所以在這季，各種鮮豔的色彩紛紛躍上舞台，極具視覺衝突，卻也有著令人驚豔的平衡感，在保守與前衛間曖昧不明，也在極度自然與人工化中拉鋸。

葉綠素，讓許多種蔬菜類擁有翠綠的色彩，但葉綠素在加熱的過程中會因為「脫綠反應」，使得顏色變得暗沉，在這樣微妙溫度與結構變化中，顏色如同擁有生命般活了起來，存在於番茄、胡蘿蔔、南瓜等蔬菜中的類胡蘿蔔素，它創造了最自然的鮮豔、紅與橘，是一種比較不會被高溫破壞的營養素，能夠保留鮮豔的色彩。

而類黃酮是種類最多卻也結構複雜的天然營養素之一，其中的青花素是茄子、紫高麗菜與藍莓等蔬果的重要色彩，它雖然不易受到溫度的影響改變結構，但卻容易因為酸鹼值的變化，而使色彩有極端的轉化，這些顏色來自大地之手，卻有著不可思議的飽和度和鮮豔度，在今年春夏，可以從大自然的調色盤中找尋色彩靈感，畫上一抹紫粉，或鮮豔欲滴的紅，都能讓人留下極大的印象，具有時尚個性卻也不會太過前衛。

## 天然护肤品 能不能给力？ NATURAL POWER

现代医学之父希波克拉底(Hippocrates)曾建议：“让植物成为你的药”[let plants be your medicine]。时至今日，无论我们利用科学技术人工合成多有效的化学成分，只要瓶瓶罐罐上贴有“天然”、“有机”或者“植物”的标签，大部分的女性还是会心生产切感。

人物编辑：JEFF TSE 模特：LUZA WINDBERGER(右) 化妆：BERTA CAMALIED ROOIJ 发型：NANCY CADELLA 食物摄影：尹芳 资料整理：AREL/MAGGIE 撰文/编辑：DASY CAI

人类在自然之母的孕育下已经进化了38亿年，当肌肤发生问题时，我们对于天然护肤成分的渴求和信赖可以理解为一种“本能”或“天性”——亲近自然意味着得到安全感和治愈心理和心灵上都是。与前几年市场产品匮乏的局面不同的是，现在，国内已经有越来越多的天然、有机护肤品牌可供选择。产品也注重实际护肤功效和皮肤感受，而非只炒天然有机概念。ELLE为你精选的这些全新上市天然产品都至少含有80%以上的天然成分或天然提取物(经国际皮肤科专家验证它们确实有效)。其中有一些是你已熟悉的品牌，但新品突破之处能让你大吃一惊：大部分品牌则是刚刚漂洋过海来到中国，小众却绝对值得你多了解一下。现在就来享受大自然的护肤奇迹吧！

不够天然？能不能给力？

大家会去买天然护肤品，通常是因为它们更加温和，不会过分刺激皮肤，或者只是因为想生活得更“绿色”些。但不天然护肤品也有它的魅力，就在前不久，它们的效果怎么也不能跟实验室里经过反复测试后合成的化学成分相比。知道这个消息后失望的不只是你一个。事实上，除非你像Shella McCartney那样从小在有机农场长大，对有机植物有特殊的情感；除非你经常去印度和马达加斯加之类的地方并且喜欢钻研瑜伽和冥想；除非你内心坚定，从不受受到化工香料营销、顺滑质感的诱惑，否则真的就只有少数人能坚持一直使用效果不大但售价并不便宜的纯天然护肤品。

如果就导致许多品牌把少许天然成分添加进面霜/乳液中去[有的比例只有5%]，打着“天然”“微号”引(或者说“安抚”)你，但

实际起效的却还是绝对对大比例的化学合成剂。“只是把葡萄放在乳膏里，就让人相信产品具有葡萄的抗氧化作用是没有说服力的。”护肤专家、著名的成分检测人Lewie Bouman说，“即使是含有100%的天然成分，产品要真正达到功效，还需要看是不是经过提取后获得的稳定天然成分，有没有去除刺激性物质，还要经过很多道工序测试才能知道它们到底能不能被皮肤吸收。”

因此，一款值得尝试的天然护肤品，不仅要够天然(含至少70%以上的天然成分/提取物)，还必须天然得够给力(天然成分能被肌肤吸收，有真实的护肤效果)。

寻找给力的天然护肤品

天然护肤品真的不能和人工化学合成剂比拼产品效果和使用愉悦度吗？敏感、抗老化、祛痘、卸妆清洁……这些看似对天然护肤品来说是“不可能完成的任务”，现在都取得了突破，或许能重新点亮你心中的绿色梦想。

**提提：**西非光果黑木棉树(African Anogeissus)的树皮

提提西非光果黑木棉(African Anogeissus)的树皮是护肤黄金成分，法国Strasbourg大学的博士McFemmel说：“我几乎每天都会开维他命C的处方，这类化合物在去除细纹和皱纹方面被皮肤科公认有效。”但维他命也有光敏性，导致皮肤干燥、刺激性大等弊端。

而Origins的专家们却在西非找到了神奇植物——光果黑木棉(African Anogeissus)，从其树皮提取的天然精华可以刺激肌肤的胶原蛋白(决定了肌肤的弹性、紧致度和外观是否年轻)，让肌肤从内到外充盈起来，减少表面的皱纹。经过独立皮肤科专家

然而，這個閃閃發光的爵爺，是許多人对謝司可的直接聯想。從 60 年代初期的舞蹈延伸而來的「主流文化」，影響了好幾個世代的許多青年，也造就了不少新藝文和流行音樂，當時 Bob Coen 因為《週末夜狂熱 Saturday Night Fever》大獲全盛，成為各大舞廳必播的音樂，在這部電影中，John Travolta 飾演了生長於紐約布魯克林區的青少年東尼，一個白天在工廠做著零工的工作，每到週末夜就會到謝司可舞廳狂歡，成為亮眼的舞林高手，並與女主角 Karen Considine 開始一段浪漫的新生活。

這部電影讓許多80年代年輕男女對人生有另外的體悟，也造就了一股新的迪斯科潮流。大家紛紛模仿電影裡男女主角的穿著打扮，男生穿著 John Travolta 的翻領白西裝，搭配誇張的喇叭褲，希望自己是週末夜裡的閃耀之星。女生勉起個大捲頭，穿上緊身上衣或超短亮片洋裝，一抹鮮豔的紅唇展現女性魅力，以大量的金銀光澤點綴雙眸，在 Disco Ball 的折射下，幻化不同於白天的性感姿瀟。

迪斯科的風潮，也意味著新意識流的誕生。在思想多元的70、80年代，年輕人大多展現自我個性，不被時代黑白所困，有了思想革命，讓美觀變得更具層次。迪斯科充滿金屬光芒的秀髮亦是時尚設計師們的最愛，Lucia Piretti說：「Jason Wu在這季的衣服裝中使用了大量金屬色片，我希望在彩妝中也可以與它相互輝映，所以將帶有金屬光澤的金量與銀色亮粉亮色亮粉亮色亮粉使用，或是點綴於顴骨上方，讓整體的造型更清新的肌膚加上少許的金屬光澤。」

## 越天然越美丽? NATURAL BEAUTY

绿色概念正在快速席卷全球，渗透到生活的各个方面。美容保养也不例外。当越来越多的“绿色产品”涌现在我们面前，你是不是也有这样的困惑：什么是绿色保养品？它们对传统产品会产生什么影响？有机、天然的产品更有效、更健康、更安全吗？选用这些产品真的就更符合环保生活的标准吗？ELLE为你打开这扇绿色大门，解读这脱21世纪的“自然”保养趋势。

特约撰稿：SIO 特约撰稿：JANE/周艺/MAGGIE/阿丽 撰文/编辑：DANY CAI

**你**的生活中是否存在这样秉持环保主义的女性？她的生活极简绿色，只吃素，只购买有机绿色蔬果水果，对纯天然的饮品和衣物情有独钟，不符合自己绿色标准的物品绝对不会购买。但即使是这样一位女性，在选购保养品时，也会在产品的功效与是否绿色、有机上难于取舍。你会不会为了美丽放弃自己的绿色梦想呢？

### 绿色产品更健康、更安全吗？

当消费者被问到“为什么选择有机/天然保养品”时，十有八九的回答是：“因为它们不含防腐剂。”防腐剂是健康和安全的头号敌人？专家们的看法或许和你想的并不一致。

如今，护肤品科技已经进入微胶囊、仿生结构时代。它们能深入渗透皮肤，效果越来越显著。然而，“化学分子非常顽固，将囤积在体内，在血液中被代谢成产品中使用的防腐剂的量可以高达80%。而有机保养品和脂在体内自然分解。”法国有机保养品Bioviva实验室的专家Cyrille Telange告诉我们，“但这并不说明绿色产品是绝对安全的，因为为了延长保质期，许多有机品牌会在产品中加入精油——这是非常容易引起过敏反应的。”

有些品牌则会在产品内加入法国爱科赛尔国际生态认证中心Ecocert的《有机体认证宪章》中允许使用的传统防腐剂。但由于有机成分不稳定，所以常常导

致的结果是：有机保养品中允许含有的5%非有机成分都由传统的防腐剂构成。这样反而会导致防腐过量，可能会引起皮肤发痒、轻度发炎等问题。因为传统防腐剂也会杀死皮肤上有益的细菌。

Clarins 国际研发总监Lionel de Benetti认为：“许多人被误导，认为Parabens这种防腐剂是有毒的，但在我们使用的剂量下，它是最高效的防腐剂。而不添加Parabens作为防腐剂的护肤品可能会用其他有害不明的物质来作为替代品。”

“天然产品并不是天生比合成产品安全。”Dior全球护肤总监Louis de Saint Michel也如此认为，他解释说Dior集团的产品及其成分都是经过安全评估的，包括用量和产品的使用方法。“在某种情况下一些天然产品可能会更加危险，合成的成分直接使用时是安全的，所以纯天然并不和安全划等号。”

### 绿色产品更有效吗？

Origins品牌的全球市场部经理Jenny Belcamp说：“如果绿色产品是有效的，那么消费者就会去买。否则，她们肯定不会选那些传统的低效产品。”

宝洁P&G公司也有类似的说法：“女性在选购绿色产品的同时并不希望这些产品有其他方面的劣势。”宝洁Beauty & Grooming的企业发展部高级Jenny Rushmore说：“但是，天然产品最大的代价就是使用效果会打折扣。

# květinové vyznání

*Ať už plánujete vyřknout své ano před barokním oltářem  
nebo na oblíbené louce, je jisté, že při obřadu budete  
v třesoucích rukách držet svatební kytici. Sladte své líčení  
právě s ní a nechte za sebe hovořit květomluvu...*

*Text: VANDA VYČÍTALOVÁ / Foto: JEFF TSE*

### UPŘÍMNÁ GERBERA

Kyticí gerber vám podle květomluvy budoucí manžel prozrazuje: „Jsem upřímný.“ Protože se od vás ten den čeká jen jediné láskyplně vyřčené slovo, pozornost všech se bude nejvíce upírat právě na vaše rty. Nechte je promluvit beze slov a zkrášlete je barevným tónem své kytice. Zvolte hřejivé červeno-oranžové tóny jako z přehlídek Marni a Fendi nebo chladivé červeno-modré po vzoru modelek návrhárek Dianne von Furstenberg či Jil Sander. Vždy však volte matné, vyhněte se okázalému lesku. Zbytek tváře může zůstat pouze v závoji béžové podkladové báze a bez řasenky. Alespoň vám ve chvíli dojetí nesteče a nezačerní oči. Tip MC: Rty před líčením přepudrujte a rtěnku naneste pomocí štětce. Barva bude lépe držet.

## DŮVĚRA V KOSATEC

„Pouze ty mi můžeš vrátit klid,“ nebo „Věř mi,“ ujišťují podle květomluvy žlutomodré květy kosatce. Květina známá i pod jménem iris získala právem své jméno po antické bohyni duhy. Pokud budete mít pugét právě z jeho květů, měla jste šťastnou ruku. Kosatec byl oblíbený už ve starověku a později spolu s lilii a růžemi zdobil nejednu zámeckou zahradu. Žlutomodrá, krémová nebo odstíny fialové – svatební květinová ozdoba může hrát nejrůznějšími barvami duhy stejně jako líčení vašich očí. Blankytné jako na přehlídkách Pilotto, lila podle značky Etro nebo citronově žluté po vzoru modelek Doorí. Tip MC: Před líčením na víčka rozprostřete trochu korektoru a lehce je přepudrujte sybkým pudrem.

## ZAMILOVANÁ RŮŽE

„Jsi krásná a vždy tě budu milovat,“ šeptají něžné lístky bílých a růžových růží. Vykročte k oltáři v barvách královny květin stejně jako modelky z přehlídky Katran-zou a máte vyhráno. Její tóny totiž lichotí každému věku i odstínu pleti. Přestože můžete zůstat pouze u jemného nádechu, vřele doporučujeme nebát se a sáhnout po živější barvě. Skvostně zkrášlí oční víčka, v kombinaci s ožněnou perletí oživí rty a na tvářích vykouzlí dokonalý ruměnc. Tip MC: Na lícní kosti naneste menší množství nejlépe krémové nebo gelové tvářenky a na tvářích tón postupně ubírejte až do ztracena. Obličej tím krásně vymodelujete.

## ALZA IL VOLUME

**S**i chiama *Macrolane* la risposta alle preghiere delle donne con curve da calza piatta, ma un'idiosincrasia congenita per silicone e affini. Intendiamoci, anche in questo caso "il trucco c'è": i centimetri in più di circonferenza toracica non sono un regalo di madre natura, bensì la conseguenza di punturine di acido ialuronico che il medico pratica in anestesia locale e inietta con una microcannula in una semplice seduta di mezz'ora in ambulatorio (non a caso è definito "un intervento da pausa pranzo"). E i cui effetti durano fino al riassorbimento parziale o totale del prodotto (dai 12 ai 24 mesi) regalando fino a una taglia in più. Poi serve un ritocchino, anche se la quantità di prodotto iniettato la seconda volta (o in quelle successive) sarà inferiore ai 100 cc della prima e, di conseguenza, meno pesante per il portafoglio.

Proprio il costo non esattamente a buon mercato - dai 2 mila 500 ai 5 mila euro, a seconda del chirurgo scelto e della quantità di acido usata per il trattamento iniziale, a cui si aggiungono circa 1.500 euro annuali per il mantenimento - e il fatto che sia "a scadenza", rappresentano il vero limite di questo intervento. Che, per contro, a detta dei medici, non avrebbe altri effetti collaterali se non un normale indolenzimento destinato a sparire nel giro di 1-2 giorni. Ovviamente, per almeno una settimana è preferibile evitare attività sportive troppo intense e bisogna indossare reggiseni contenitivi (quelli da palestra), mentre per scongiurare ogni possibile rischio di infezione bastano tre giorni di antibiotici.

### EFFETTO FILLER

Basato sulla tecnologia di *Restylane* (il riempitivo naturale a base di acido ialuronico che spiana le rughe e definisce i contorni del viso), anche il *Macrolane* è prodotto dalla svedese Q-Med, società di biotecnologie leader nel settore, che ne ha iniziato la sperimentazione nel 2002. «È il primo

trattamento sicuro per il corpo a base di acido ialuronico», spiega Duncan Hesketh, Business Development Director di Q-Med. «Proprio le sue caratteristiche naturali di completo riassorbimento lo rendono veloce, immediato nei risultati e assolutamente non invasivo, perché non lascia cicatrici». Più compatto e coeso (pur restando duttile) rispetto al *Restylane*, il *Macrolane* è, dunque, il primo filler riassorbibile pensato per il corpo e si presta perciò a molteplici usi: può essere scelto per valorizzare il seno, ridefinire glutei e polpacci, arrotondare i contorni della silhouette o riempire i vuoti lasciati da liposuzioni e cicatrici post-trauma. Di recente, il prodotto ha ottenuto la certificazione europea e, dopo aver spopolato in Giappone, dove la naturale conformazione minuta delle donne sembra fatta apposta per questo tipo di intervento, ha conquistato l'Inghilterra. In Italia siamo ancora agli inizi (il *Macrolane* è arrivato da poco), ma a detta degli esperti, il riscontro sarebbe già positivo. «Si tratta indubbiamente di un prodotto inno-

**P**ensi di sapere veramente di cosa ha bisogno la tua pelle? Probabilmente dopo aver risposto a queste domande avrai le idee più chiare. Non è il solito test (non si parla direttamente della pelle), ed è frutto dell'esperienza di una guru dello skincare: Joëlle Ciocco, biochimica che, da

35 anni, osserva la pelle con la lente di ingrandimento. Nel suo istituto di Parigi in Place de la Madeleine (tel. 00330142605880), fornisce consulenze ad hoc e le sue idee "rivoluzionarie" sono apprezzate da star internazionali del calibro di Monica Bellucci e Cindy Crawford (il loro incarnato luminoso è opera di Joëlle!). Lo scopo del test? Valutare lo squilibrio dell'ecosistema dell'epidermide e trovare le cure più

adatte. Per Joëlle, infatti, l'equilibrio della pelle è una sottile alchimia fatta di idratazione, proteine, vitamine, oligoelementi, minerali, antibiotici (una flora batterica che garantisce la difesa immunitaria in superficie), grassi e filtri naturali che rappresenta la miglior cura anti-età. ## Pretty (Easy!) Summer Hair

You *can* have good hair days this time of year. Flip the page for four sleek and simple new styles you'll love.

**YOU DON'T WANT TO SPEND A TON OF** time doing your hair when the weather is gorgeous—you'd rather be outside! But that doesn't mean you have to settle for zero style. It doesn't take long to pull off these incredibly cute summer styles. From an easy-breezy blowout to a no-fuss bun, here are our favorite perfectly imperfect looks—including this summer's hot new crop.

**Look #1:**  
*grown-up ponytail*

This season's pony is soft, chic—and high. (Perfect to play up your cheekbones!) While this version might take a little more effort than a wash-your-face-before-bed ponytail, it's still a lazy girl's dream.

**hair how-to:** Smooth back any flyaways or loose pieces around your face, then tighten hair to your scalp and secure it with an **elastic band** (above). "You want to place it high, at the back of the crown," suggests celebrity stylist Riccardo Maggioro of Riccardo Maggioro Salon in New York City. The trick to making it modern? "Teasing for added volume," Maggioro explains. Simply back-comb the top section of the ponytail from the elastic to the ends, which will add instant texture. If teasing isn't your thing, use a wide curling iron like the **Bed Head Curl Amp 1 1/2 Inch Styling Iron** (below, \$20; amazon.com) to create ringlets throughout the tail. "For a little extra oomph, wrap a small section of hair around the elastic to conceal it," Maggioro says. Finish with a hit of hair spray.

**Look #2:**  
*undone bun*

Looking for a way to tame out-of-control summer hair? Try a top knot! "It's dressy enough for the office yet relaxed enough to wear to a Pilates class," says Jack Panico, owner of Panico Salons and Spas in New Jersey and Florida. "This updo works great on day-old hair—the built-up natural oils allow for a better hold."

**hair how-to:** Pull hair into a high ponytail, and secure it with an elastic band. "How tight or loose you secure the band is up to you. That's what's great about

this look—it always looks good," Panico says. Then divide your ponytail into four equal sections. Grabbing one section at a time, wrap each one around the base of the hair elastic, alternating between clockwise and counterclockwise directions. Secure with a **bobby pin** (below right). A shot of hair spray finishes the look, but be careful not to use too much, Panico explains: "You want a few hairs to pop out; it's supposed to look a little messy."

### Look #3: *soft, sexy blowout*

"Perfectly straight blow-outs are out!" says Karmela Lozina, a stylist at the Sahag Workshop in New York City. The more modern version, Lozina notes, is a laid-back look with a little movement and life to it. **hair how-to:** After shampooing, spray the crown

area with a root lifter. Then add a lightweight mousse to your roots, distributing any extra through the ends. Turn your head upside down, blow-dry your hair until it's 50 percent dry, then section your hair with clips. Beginning with the section closest

to the nape of your neck, run a round brush down your hair, curling the ends either inward or out. When hair is fully dry, reach for a few **velcro rollers** (at right). "Simply pop them in where you'd like a little lift—around your crown, for instance—then hit them

for a few seconds with a blow-dryer," Lozina says. After 10 or 15 minutes, remove the rollers and run your fingers through your hair. Spritz hands with shine spray, such as **Kérastase Paris Chroma Cristal** (above, \$37; [kerastase-usa.com](http://kerastase-usa.com)), and rub into ends to tame frizz.

### Look #4: *the hot new pixie*

HALLE BERRY

MICHELLE WILLIAMS

CATE BLANCHETT

Ever dream of chopping off your hair once the weather turns warm? Why not try a pixie, the hottest cut this summer? "Today's pixie has a lot of layering going on, along with a slightly uneven bang," Panico says. "It works on every texture except super-curly hair, and it can actually change your face shape in a good way." Keep layers longer on top (2½ to 3 inches) to elongate a full face, shorter (1 to 1½ inches) to fill out a thin face. As for maintenance: "Regular six-week trims are crucial, but beyond that all you need to do is run your fingers through your hair while drying and follow up with a dab of molding wax," Panico says.
